Harish H C

CSE (AI & ML) Engineering Student

Karnataka, India | linkedin.com/in/harish-h-c-230694406/ | github.com/harish12-2007

CSE (AI & ML) engineering student with a Python-first project portfolio in research tooling, data analysis and backend systems.

Education

B.E. Computer Science & Engineering (Artificial Intelligence & Machine Learning) — Current

Diploma in Computer Science & Engineering, Government Polytechnic, Turuvekere — 2023 – 2026

SSLC, Government Junior College, Gubbi, 80.96% — 2023

Skills

Programming	Python, Java, SQL
AI / ML	Machine Learning, Artificial Intelligence, Data Science, Model Development, Data Analysis
Web	HTML, CSS
Developer tools	Git, GitHub, VS Code, Jupyter
Databases	MySQL

Projects

- **Systematic trading research suite** (In Progress). A Python suite for testing crypto-perpetual strategies on Binance data, built around honest validation. Tech: Python, pandas, ccxt, Streamlit, XGBoost (exploring).
- **ORACLE voice assistant** (Prototype). A voice-driven, terminal-style interface for asking about live crypto futures markets. Tech: JavaScript, HTML, CSS, Binance public API.
- **Chronos matching engine** (In Progress). A low-latency matching engine for multi-symbol crypto derivatives. Tech: Python 3.12, FastAPI, Kafka, PostgreSQL, TimescaleDB, Redis, k6.
- **Multi-DEX arbitrage scaffold** (In Progress). An async Python scaffold that looks for SOL/USDC price gaps across Jupiter, Raydium and Orca. Tech: Python, asyncio, XGBoost, Solana, Jupiter / Raydium / Orca.
